

**Report  
on  
Alumni Interaction Session**

**Date:** 05-05-2025

**Total Number of Participants:** 43

**Name of Guest:** Er. Ajaldeep Singh (Junior Engineer, Water and Sanitation Department, Punjab)

**Venue:** Lecture hall F-104, First Floor, F Block

An Alumni Interaction Session was successfully conducted by the Civil Engineering Department of Baba Farid College of Engineering and Technology with the aim of inspiring and guiding current students by connecting them with past graduates who are making strides in the professional world. The guest speaker for the session was **Er. Ajaldeep Singh**, an esteemed alumnus of the department, currently serving as **Junior Engineer (JE) in the Water Resources Department, Government of Punjab**. His session focused on the importance of public sector roles in infrastructure development, especially in water supply, sewerage, and sanitation services across the state. Er. Ajaldeep Singh shared his career journey, preparation strategy for government exams, work responsibilities, and the practical challenges faced in field-level engineering. He emphasized the value of fundamental engineering knowledge, time management, and consistency in preparation for competitive exams. His session also included practical insights into planning, execution, and maintenance of rural and urban sanitation projects under government schemes. The students were highly engaged and asked relevant questions related to career paths, departmental exams, and internship opportunities. The interactive nature of the session helped students understand real-world applications of their academic learning and boosted their motivation to explore opportunities in the government sector. The session concluded with a vote of thanks by faculty members, acknowledging the valuable time and knowledge shared by **Er. Ajaldeep Singh**. His words served as a great inspiration for budding engineers aiming to serve the public through technical excellence.
